Our Mission

The BayBio Institute (BBI) maintains Northern California's leadership in life science innovation through support of entrepreneurship, science education and life science career development. The Institute's objectives are met through collaborations, partnerships, and the generosity of individuals and foundations. Please support this important work with a tax-deductible donation now.

Our History

BBI is a non-profit 501(c)(3) established in 1990 as the Bay Area Bioscience Center by the founders of biotechnology. Northern California bioscience executives and a consortium of public officials and educators saw a need to maintain and promote the intellectual and educational climate of the region. Over the last 20 years, we have been a resource for educators, start up companies, and life science professionals throughout Northern California.

BayBio Institute

Supporting the foundations of life science innovation

Our Strategic Focus

The BayBio Institute (BBI) strives to ensure that the economic and intellectual power of the region's life science industry and its employees remains strong. By maintaining our focus on programs related to entrepreneurship, science education and life science career development, BBI supports the foundations of life science innovation that have made Northern California's Bay Area the most prominent life sciences cluster in the world.

- Located in the birthplace of biotechnology, BBI is committed to ensuring that life science entrepreneurs connect to the capital and resources needed to sustain critical innovation in the industry.
- By supporting science education and educators, BBI helps build the next generation of life science professionals.
- By exposing students to career pathways and opportunities in the life sciences, connecting employers and job seekers through the BayBio Career Center, and providing professional development opportunities to incumbent workers, BBI ensures that the workforce pipeline for the industry remains strong.

Program Areas

Science Education	Entrepreneurship
Life Science Careers	Public Awareness

Giving Opportunities

- **BIOCOMMUNITY.ORG** brings increased exposure to science and science role models to under-resourced classrooms and students of diverse socio-economic backgrounds. Built on the successful National Lab Day (NLD) platform, Bio-Community.org serves as NLD's Northern California life science partner, connecting life science volunteers to grade 7-14 classrooms to positively impact STEM education in the region and beyond.
- The **Bay Area BioGENEius Challenge** recognizes high school students conducting outstanding life science research. Bay Area finalists move on to compete in the National and International BioGENEius Challenges held at the Biotechnology Industry Organization's Annual International Convention.
- Our **Entrepreneurship Program** provides life science entrepreneurs with the tools and resources they need to succeed, including practical workshops, networking opportunities and the BioEntrepreneur Help Desk.

*When Ms. Ting needed help teaching molecular biology
to her 8th grade science class ...*

... We found her a scientist

**BIO:COMMUNITY.ORG connects life science professionals with
teachers around the Bay Area to improve science education**

Donations ⚡ Internships ⚡ Class Demonstrations ⚡ Career Development

Our students are struggling

California eighth graders ranked 48th in student performance in science

Northern California is home to the largest cluster of life sciences companies in the world, employing more than 100,000 researchers, scientists and other professionals

To sustain this economic engine, **we need your help**

Join more than 400 companies in supporting science education, students and teachers at our Bay Area schools

- ⚡ Donate:** Help us bring life science expertise, supplies and passion to Bay Area classrooms
- ⚡ Volunteer:** Visit www.Bio-Community.org to learn how you can make a difference
- ⚡ Participate:** Help Build the Next Generation of Life Science Professionals
